

ADVANCED WORK BASED FIRST AID TRAINING

WORK ENVIRONMENTS ARE ALL DIFFERENT AND KNOWING WHAT TO DO AND WHERE TO GO COULD SAVE LIVES.

First aid is an essential life skill and a valuable asset for any staff member within your workplace. This training is designed for people new to first aid and working in a high-hazard environment. It covers all the basic skills required in an emergency first aid situation.

It's only a matter of time before some type of emergency occurs in your workplace.

Every industry has different risks for their staff. Our Advanced Workbased First Aid Training can be customised to your industry. We use mock scenarios your staff are likely to encounter specific to their work environment.

Make sure your staff are prepared and know how to respond if they are the one closest to a person experiencing a medical emergency.

BENEFITS

- On-site training available
- Content tailored to meet the needs of your industry
- Accelerated learning techniques suited to individual learning styles and abilities
- Interactive and hands-on course material
- Trainers with real-life emergency situation experience
- Covers NZQA unit standards 6401 and 6402, plus unit standard 6400 - required for workplace first aiders
